

Name: Nikhil Satam

Age: 33

Disability: Cerebral Palsy

About Nikhil

Nikhil Satam has cerebral palsy (CP), which has affected his lower limbs and right hand, and speech impairment.

Despite these challenges, he is determined and creative. After completing 10th grade, Nikhil faced difficulties getting into college due to his disability. He lives with his mother, a homemaker, and relies on the support of relatives for their economic needs.

He owns DTP xerox machine & was using it to run a small business from home. However, the challenges of the Covid-19 pandemic halted his business as the machine malfunctioned.

Nikhil's Journey

Nikhil's desire to learn and grow led him to I&IP, where he has been trained in computer basics and Adobe Photoshop. He began creating flyers, cards, labels, and other designs, which sparked his passion. He has started a YouTube channel to share tutorials on using Adobe.

Nikhil attends the I&IP center in Mumbai Central, where he receives physiotherapy, yoga, vocational training, English lessons, and basic computer training.

The center also discovered Nikhil's talent for drawing, painting, and crafting. He got the opportunity to design certificates and cards for an organization thereby, earning some income.

Nikhil works hard and loves designing and painting. The physiotherapy and speech therapy he receives at the center have improved his mobility, and he practices daily to maintain his progress.

Nikhil has shown initiative and enthusiasm for Photoshop and artistic endeavours. His talent extends to assisting his friends sometimes with creating advertisements or flyers. Nikhil's dedication and creativity are increasingly recognized and admired by all.
